Advancing Regenerative Sustainability with Wood Science

Hotel Bernardin, Portorož, Slovenia

Welcome to Piran, the birthplace of Tartini, the great composer and violinist of the 18th century, the Master of Nations, and an amateur mathematician and physicist. Piran is a small, picturesque town with an academic tradition and rich history. The event takes place in neighbouring Portorož, where all facilities and a variety of activities are within close walking distance.

Session Themes

- State of the art of wood science – wood structure, properties, and biodeterioration
- Novel applications of wood in the built environment
- Positive environmental contributions through wood utilization, embracing a circular bioeconomy
- Changing the paradigm, there is only high value wood
- Socio-economic impacts of sustainable wood practices
- New approaches to wood sector education
- Innovation in the forest sector, role of wood in climate mitigation
- Envisioning a future of engineered living materials
- Digitalization of wood products manufacturing

Networking, Social & Wellbeing Events

- Dinner at the Histron Church Ruins
- Sunset boat cruise
- Walking tour of Piran
- Yoga on the beach terrace
- Paradise spa wellness centre
